

DURAVIEW

THE HIGH PERFORMANCE
SASH WINDOW

INTRODUCTION

Its slim, elegant profile is favoured by architects and planners as a suitable replacement for the traditional box sash window for sensitive conservation areas.

Client: FC Brown (Steel Equipment) Ltd., Bisley. Contractor: SPA Windows Ltd., South Norwood.

Client: The Rembrandt Hotel, London SW7
Contractor: Firmcool Ltd. T/A Silverglazed.

Client: Alan Selby & Partners.
Contractor: Halstead Contracts Ltd.

Client: The Boston Boys Grammar School, Boston.
Contractor: Capitol Windows, Skegness.

CONSTRUCTION

This double hung sash window is constructed from robust, high grade aluminium. Its 95mm deep frame is further strengthened by butt joints and all sash members are cropped and screwed through integral screw ports.

Both central interlocking rails have a depth of just 35mm. The window has excellent water drainage which is provided by an integral sloping sill.

It is available ready glazed for easy installation.

HIGH PERFORMANCE

The window exceeds BS 6375 Part 1 1989 severe weather rating for both air and water.

The aluminium frames are thermally broken to help reduce heat loss and condensation. The window incorporates 28mm double glazed units for optimum thermal efficiency. High density silicone treated woven polypropylene pile, with integral weatherfin, is located on both sides of the sashes to ensure no metal to metal contact and a weathertight seal.

A marine wrap around "glazepa" gasket ensures a high degree of coefficient of friction against glass and metal, thus providing a secure, weatherproof seal.

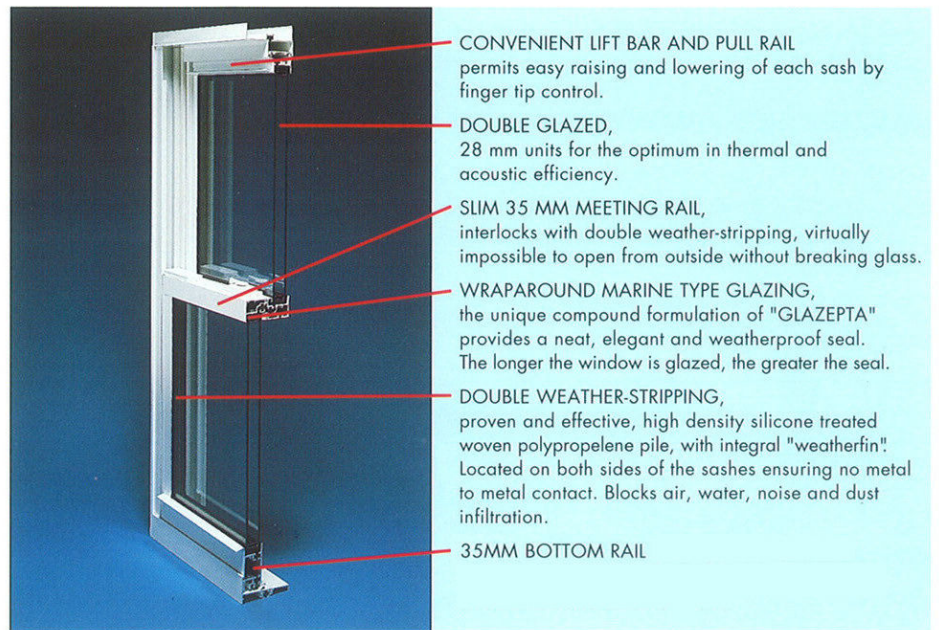

Client: Ringrose & Co. Solicitors, Boston. Contractor: H. H. Adkins (Contractors) Ltd., Boston.

OPTIONAL FEATURES

Optional features include a sash restrictor, 155mm or 190mm projecting sills, locking catches, trickle ventilators, and low 'E' glass for thermal efficiency. Georgian glazing bars, lead effects, brass furniture and authentic sash horns are also available for a truly period look.

COLOURS

The window is available in a choice of over 100 attractive polyester powder painted and anodised colour finishes, which are durable and do not flake, peel or chip.
